## Note

## Using BELIMO damper actuators

The actuators listed in this catalogue are intended for the operation of air dampers in HVAC LF24-SRControl/monitoring functions LF24-SR10 systems.

## Torque requirements

When calculating the torque required to operate dampers, it is essential to take into account all the data supplied by the damper manufacturer concerning cross sectional area, design, mounting and air flow conditions.

Open/Close actuator (AC/DC 24 V)

## Control by single-pole contact

## Application

For the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

## Mode of operation

The LF... actuator moves the damper to its normal working position while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

## Product features

Simple direct mounting on the damper spindle by universal spindle clamp. An antirotation device is supplied to prevent unwanted rotation of the whole unit.

Mechanical angle of rotation limiting adjustable with built-in stop.

## High functional reliability

The actuator is overload proof, needs no limit switches and halts automatically at the end stop.

Flexible signalling $0 . . .100 \% \nless$, with adjustable auxiliary switch (LF24-S only).

## Starting point:

Actuator in safe position

## Procedure

- Turn the knob of the auxiliary switch until the tip of the arrow is pointing to the required switching position (see left). Example: Switching point setting $=.4$ corresponds to $40 \%$ angle of rotation.
- When the actuator runs to the operating position (ccw $\downarrow$ ), the switch knob will also rotate counter-clockwise (ccw $\downarrow$ ) and the auxiliary switch will operate as the tip of the arrow passes the scale zero (S1-S3 linked).

## 3-point control

## Application

For the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

## Mode of operation

The LF24-3 is controlled by a 3-point signal. The actuator runs to the position specified by the control signal while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

## Product features

Simple direct mounting on the damper spindle by universal spindle clamp. An antirotation device is supplied to prevent unwanted rotation of the whole unit.

## Modulating actuator (AC/DC 24 V)

Control DC $0 . . .10 \mathrm{~V}$ and position feedback DC 2... 10 V

## Application

For the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

## Mode of operation

The LF24-SR is controlled by a standard DC $0 . . .10 \mathrm{~V}$ signal. The actuator runs to the position specified by the control signal while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

## Product features

Simple direct mounting on the damper spindle by universal spindle clamp. An antirotation device is supplied to prevent unwanted rotation of the whole unit.

Mechanical angle of rotation limiting adjustable with built-in stop.

## High functional reliability

The actuator is overload proof, needs no limit switches and halts automatically at the end stop.

## K6-1

K6-1
Spindle clamp
Suitable for damper spindles $16 \ldots 20 \mathrm{~mm}$ diameter.
 16... 20

The spindle clamp is secured to the actuator by means of a circlip.

## KH-LF

Crank arm with slot width 8.2 mm
Suitable for damper spindles $8 . . .16 \mathrm{~mm}$ diameter.

8... 16

The crank arm is secured to the actuator by means of a circlip.

## KH-LF1

Crank arm with slot width 8.2 mm
Suitable for damper spindles $16 . . .20 \mathrm{~mm}$ diameter.
 $16 . . .20$

The crank arm is secured to the actuator by means of a circlip.

## ZDB-LF

Angle of rotation limiting and pointer

The pointer is secured to the actuator by means of a circlip.

## ZG-LF1

Damper linkage kit for flat mounting (with 2 ball joints KG8)

ZG-LF3 (Application example see page 14, fig. 2)

## ZG-LF3

Damper linkage kit for side mounting (with 2 ball joints KG8)

KH8
Universal crank arm
Zinc-plated steel; suitable for damper spindles
Ø 10... 18 mm or
$\square 10 \ldots 14 \mathrm{~mm}$, slot width 8.2 mm .

KG8
Ball joint
Zinc-plated steel; suitable for use with KH8 universal crank arms and round steel rod $\varnothing 8 \mathrm{~mm}$.

KG10
Ball joint
Zinc-plated steel; suitable for use with KH8 universal crank arm and round steel rod $\varnothing 10 \mathrm{~mm}$.

AV10-18
m0020707

## AV10-18

Universal spindle extension
Suitable for damper spindles $10 . . .18 \mathrm{~mm}$ diameter.
 $10 . . .18$

If an AV10-18 is to be used in conjunction with an LF..., the actuator must be fitted with a K6-1 spindle clamp.

Flat mounting (fig. 1)
Kit specification ZG-LF1
